SETTING		/ 🖪 🖸 🕖
GENERAL DISPLAY PAN/TILT/ZOOM TEXT OVERLAY ACCOUNT	Display Tour Setup Enable Tour Motion Tour Type View 1 Window Split View 1	Interval 5 s
AUTO MAINTAIN BACKUP DEFAULT UPGRADE	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	Group
	Add Delete Default	Up Down OK Cancel Apply

- Enable Tour: Highlight box here to enable this function.
- **Interval:** System supports 1/8/-window tour. Input proper interval value here. The value ranges from 5-120 seconds. It is for schedule tour/alarm/motion detects tour.
- **Split:** You can select window split mode from the dropdown list.
- **Channel Group:** It is to display all channel groups on current split mode. You can edit and delete a channel group here. Double click an item in the list; you can edit its channel group setup. Right now system max supports 32.
- Add: Under specified window split mode, click it to add channel group.
- **Delete:** Click it to remove selected channel group.
- Move up: Click it to move current selected channel up.
- Move down: Click it to move current selected channel down.
- **Default:** Click it to restore default setup.

- After all the settings you can view the tour. See below figure

• Use mouse or Shift button to switch 🙆 and 🙆 button to enable /disable tour. 🙆 Means the Tour function is enabled And means Tour function is disabled
